

CreditPulse-AI

Autonomous Risk Management & Real-Time Portfolio Stress-Testing for Modern Lenders

T A Srinivas (Founder & Lead AI Engineer)

T. Pujitha Sri (Co-Developer)

🛡️ POWERED BY KAGGLE CREDIT BENCHMARKS & 100% SECURE SYNTHETIC DATA FRAMEWORKS—ZERO DPDP ACT FRICTION

The Core Problem

Workflow Deficiencies

- ✗ **Severe Operational Backlogs:** Risk analysts waste critical hours scrubbing manual, chaotic data logs in rigid, error-prone spreadsheets.
- ✗ **Delayed Loss Detection:** Volatile credit trends go fully undetected until major capital losses are already booked.

The Structural Blindspot

Traditional tools are fundamentally static. When macroeconomic risk thresholds shift unexpectedly, sheets fail to show immediate financial exposure.

This critical delay prevents immediate decisioning, leaving lenders blind to rapid downstream portfolio deterioration.

Customer Journey Map

The Decision Engine

Universal Intake

Smart column auto-mapping and robust dataset cleanup of raw, unstructured client uploads. Handles chaotic headers seamlessly.

Autonomous Auditor

Advanced mathematical logic that instantly triages complex portfolios into Growth, Stable, Nudge, or Critical Block states.

Dynamic Controls

Interactive limit sliders allow risk managers to easily simulate broad, hypothetical credit policy updates before execution.

The Interactive Engine

- ✓ **Live Policy Sandbox:** Fine-tune risk limits and critical debt-to-income controls on-the-fly via Streamlit's web-interactive dashboard elements.
- ✓ **3D Health Analytics:** Multidimensional scatter plots reveal hidden high-risk concentrations visually across multiple variables.
- ✓ **Automatic Grading Scale:** Advanced scoring structures immediately color-tag assets dynamically from Excellent to Bad.

The screenshot shows a web application interface with a top navigation bar containing 'Analysis' and 'Story' tabs. Below the navigation bar is a header section with a search bar and a 'Expense Details & Ad' button. The main content area is divided into several sections:

- Filters:** Four search filters are visible: 'Corporate Entity' (Global, Global - Corporate), 'Operating Division' (Capital Opportunities, Capital Solutions, Corporate, Customized Credit Strate...), 'Expense Type' (Business Development, Communications and Inf..., Depreciation and Amortiz..., General Administrative a...), and 'Cost_Center.Levels(3)' (Administration, CCS Europe Credit Resea..., CCS Europe Portfolio An..., Fund Accounting).
- Data Sets:** A dropdown menu showing 'Expense Table'.
- Dimensions:** A list of dimensions including 'Corporate Entity', 'Cost_Center.Levels(1)', 'Cost_Center.Levels(2)', and 'Expense Type' (highlighted in green).
- Measures:** A list of measures including 'Actuals', 'Fav/(Unfav) %', and 'Fav/(Unfav) \$' (all highlighted in green).
- Expense Table:** A table with columns for 'Expense Type', 'Actuals', 'Forecast', and 'Fav/(Unfa)'. The table contains data for various expense types, including 'Totals', 'Business Development', 'Communications and Information Services', 'Depreciation and Amortization', 'General Administrative and Other', 'Interest Expense', 'Occupancy and Equipment', 'Other Op Expense Summation GAAP', 'Professional Fees', and a final row with a dash.

Expense Type	Actuals	Forecast	Fav/(Unfa)
Totals	434,320,737.08	195,376,561.02	-238,944,176
Business Development	26,532,658.76	28,495,822.40	1,963,163
Communications and Information Services	3,004,344.02	3,034,663.15	30,319
Depreciation and Amortization	67,297,719.70	7,984,030.06	-59,313,689
General Administrative and Other	251,324,987.70	101,708,161.44	-149,616,826
Interest Expense	1,407,942.24	1,443,856.35	35,914
Occupancy and Equipment	16,330,406.66	16,827,928.64	497,521
Other Op Expense Summation GAAP	33,336,740.56	869,821.66	-32,466,918
Professional Fees	28,016,494.13	30,491,983.11	2,475,488
-	7,069,443.31	4,520,294.20	-2,549,149

Secure Architecture

- ✓ **Baseline Validation:** Machine learning models thoroughly benchmarked and precision-tuned using highly dense, open Kaggle financial credit datasets.
- ✓ **Stress-Testing Scale:** Powerful synthetic data engines simulate thousands of black-swan default trajectories and high-friction anomalies.
- ✓ **The Regulatory Shield:** 100% synthetic testing and analysis pipeline guarantees zero corporate data leaks, matching strict DPDP Act compliance.

Market & Go-To-Market

The Target ICP

Ideal Customer Profile: Digital-first micro-lending applications, peer-to-peer (P2P) financial platforms, and fast-scaling Fintech NBFCs.

Beachhead Buyers: Mid-market Indian digital lenders handling high-velocity, small-ticket transactional loan files demanding low compliance friction.

Acceleration Growth Loop

We systematically bypass slow procurement cycles through developer-centric engagement structures.

Open Sandbox Access: Leveraging open API configurations, we let credit risk heads import and test synthetic distributions in under 10 minutes.

Business Model & Pricing

Pricing Tier	Target Alignment	Operational Model	Value Metric
Pilot Sandbox Tier	Accelerator sandboxes & validation loops	ZERO-COST	Limited testing ingestion capacity
Commercial Volume Tier	High-velocity scaling FinTech apps	FLAT RECURRING	Scaled dynamically by volume of active accounts
Enterprise Infrastructure Tier	Regulated, enterprise institutions	CUSTOM SLA	Single-tenant dedicated secure cloud deployments

| Operational Milestones

Let's Accelerate Risk AI

Partner with us to build compliance-ready portfolio scoring systems.
